

Creating Colour!

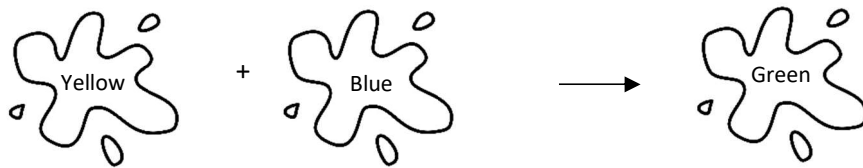

Teaching resource

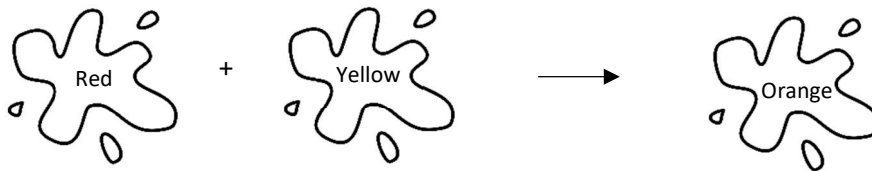

In this exercise, we are going to take on the role of a colour scientist! We practice problem solving to help us make new colours.

Find a formula to make the new colours by using colours we already know. Colour and/or write the correct colours in the paint blobs.

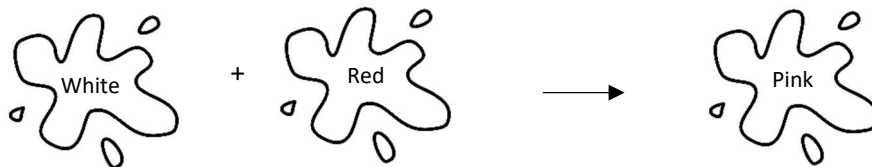

a)

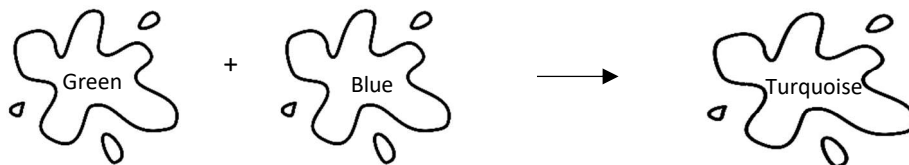

b)

c)

d)

Bonus: The three primary colours are red, blue, and yellow. A primary colour is one which cannot be made by mixing other colours together.
